20. Glossary

1 • Introduction

KLiXO Coach is a web portal that lets a coaching centre run daily attendance and its class timetable from a phone or computer — no spreadsheets to touch.

Teachers open their classes for the day and tap each student Present, Absent or Late. Owners get a live dashboard (overall attendance, students who are falling behind, schedule problems) and full control of the centre's data: students, batches, enrollments, teachers, rooms, holidays and settings.

Two kinds of users

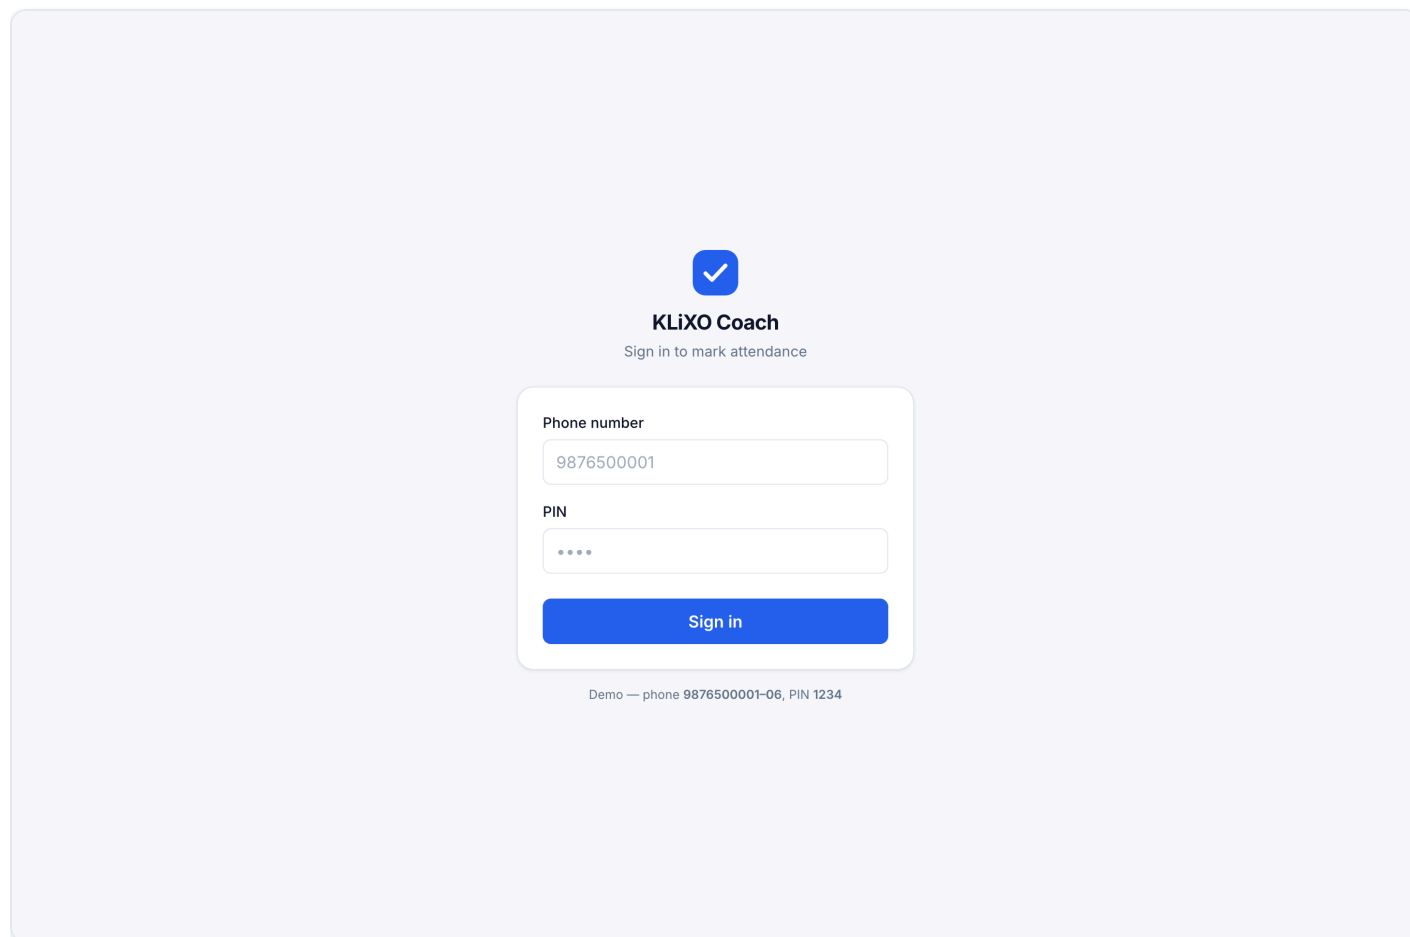

Role	What they can do	Where they land after signing in
Teacher	See and mark their own classes (today and past).	Today
Owner	Everything a teacher can do, plus the dashboard and all centre management. May also teach.	Dashboard

Note The portal works on any modern phone or laptop browser. There is nothing to install.

2 · Signing in

Open the portal address and sign in with your **phone number** and **PIN**. Your PIN is set by the centre owner.

1. Go to the portal address (e.g. `klixo-coach.vercel.app`).
2. Type your registered **phone number**.
3. Type your **PIN**.
4. Tap **Sign in**.

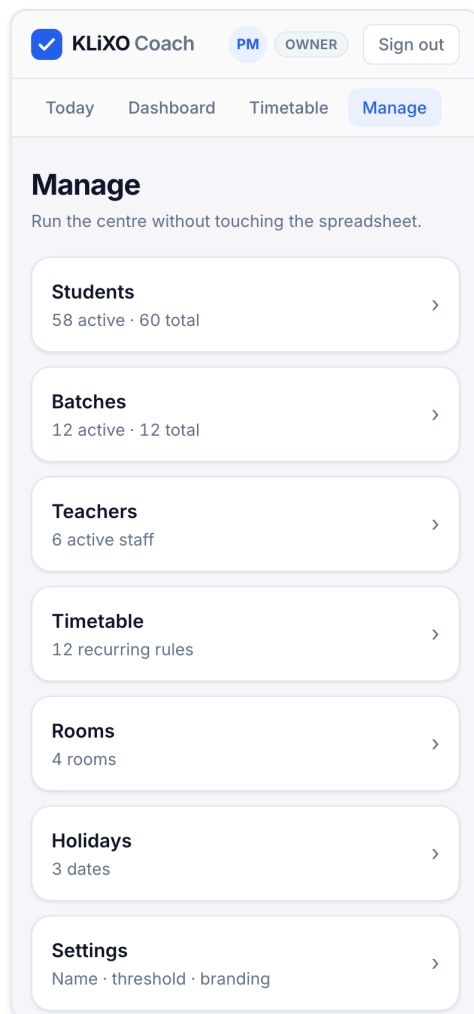

The sign-in screen

Locked out? After several wrong PINs in a row, sign-in is paused for about 15 minutes to keep the account safe. Wait and try again, or ask the owner to reset your PIN.

Tip Sessions stay signed in for 12 hours, then ask for the PIN again. Use **Sign out** (top-right) on a shared device.

3 · Getting around

The bar at the top is the same on every screen. Teachers see **Today**. Owners also see **Dashboard**, **Timetable** and **Manage**. Your name and role sit on the right, next to **Sign out**.

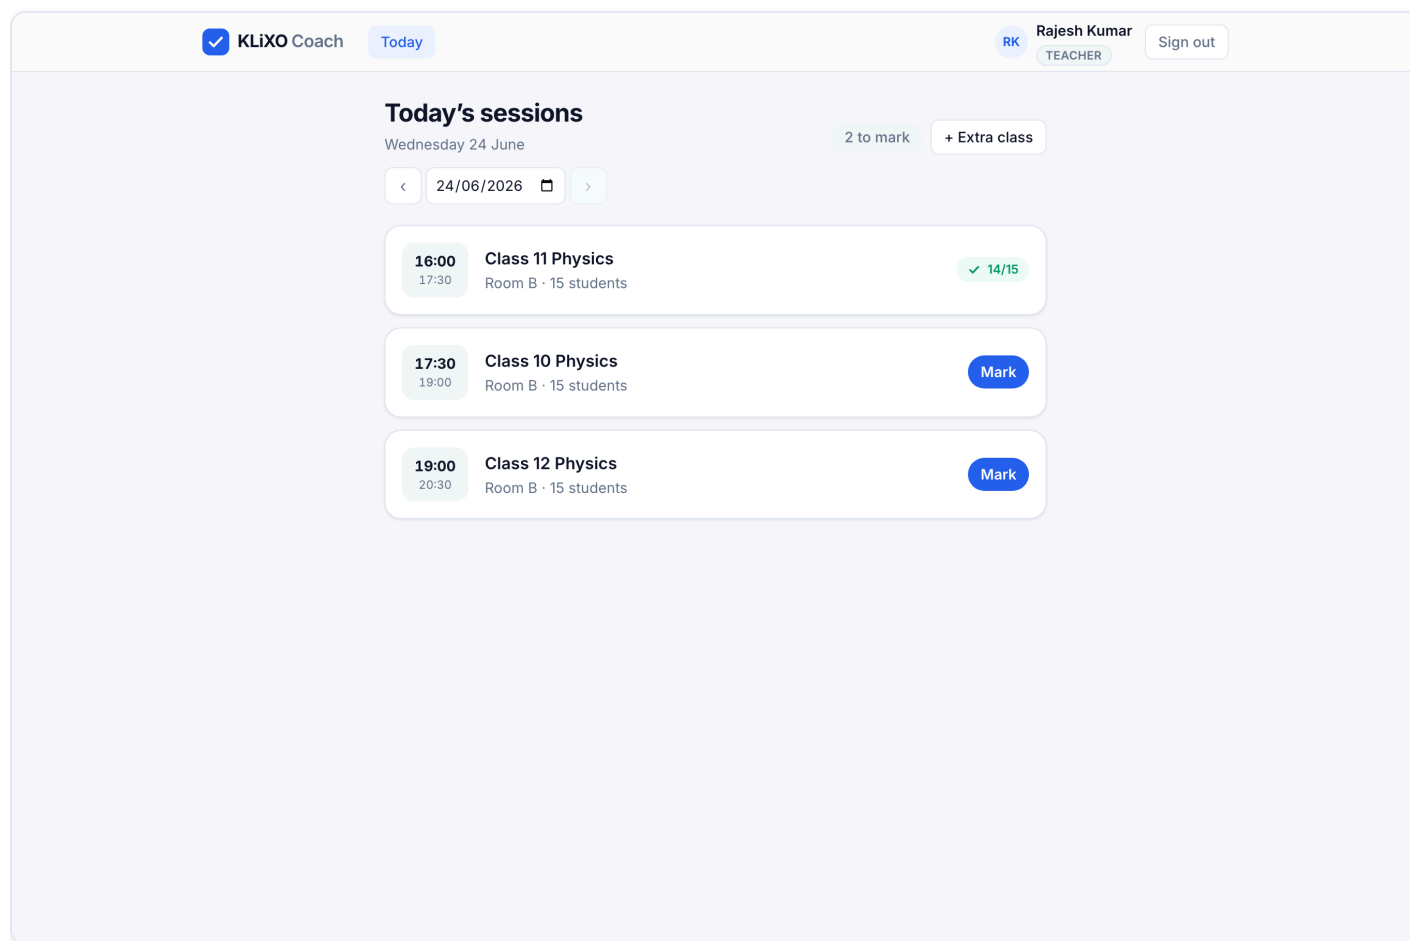

On a phone the menu sits on its own row and scrolls sideways if needed

Note Owner-only screens are hidden from teachers, and are protected on the server too — a teacher cannot reach them by typing the address.

4 • Teacher — Today

Your home screen. It lists the classes you teach for the selected day, with how many students are present out of the roster.

A teacher's classes for the day

- Each card shows the batch, time, room, and a **marked / unmarked** status.
- Use the **date arrows** to look at earlier days. Future days can't be marked.
- Tap a class to open its roster and mark attendance.

Note You only see classes assigned to you (including any you are covering as a substitute). The owner sees every class.

5 · Marking attendance

Open a class to see its students. Set each one to **Present**, **Absent** or **Late**, then save.

The screenshot shows the KLIXO Coach app interface. At the top, there's a header with 'KLIXO Coach', 'Today', and a teacher profile 'Rajesh Kumar' with a 'Sign out' button. Below the header, there's a 'Back' button and a class card for 'Class 11 Physics' with 'Room B · 14 students' and a time slot '16:00-17:30' for '2026-06-24'. The main section is titled 'ROSTER' and contains a list of 14 students. Each student has a circular icon with initials and three buttons for status: 'P' (Present), 'A' (Absent), and 'L' (Late). A summary bar shows '14' students with 14 'P' icons and 0 'A' or 'L' icons. A 'No changes' button is visible. At the bottom, there's a 'SESSION CONTROLS' section with a 'Cancel session' button.

Student	P	A	L
AI Aanya Iyer	P	A	L
AR Amit Reddy	P	A	L
AR Avni Rao	P	A	L
KP Karan Patel	P	A	L
KM Kavya Mehta	P	A	L
MM Mira Malhotra	P	A	L
NJ Nikhil Joshi	P	A	L
PM Pari Malhotra	P	A	L
PJ Prisha Joshi	P	A	L
● 14 ● 0 ● 0			
RP Riya Patel	P	A	L
SM Sara Malhotra	P	A	L
TM Tara Mehta	P	A	L
VM Varun Mehta	P	A	L

SESSION CONTROLS

Cancel session

The class roster — tap a status for each student

1. Tap the status for each student (Present / Absent / Late).
2. Tap **Save** at the bottom.

Tip The roster only lists students whose enrollment had started by that date — late joiners don't appear on earlier classes, so percentages stay fair.

Can't mark? Cancelled classes and future dates can't be marked.

6 · Correcting past attendance

Open any past class and change a student's status. The portal records *how* each mark was made so corrections are transparent.

Update

Cancel session

Re-opening a class shows each student's saved status

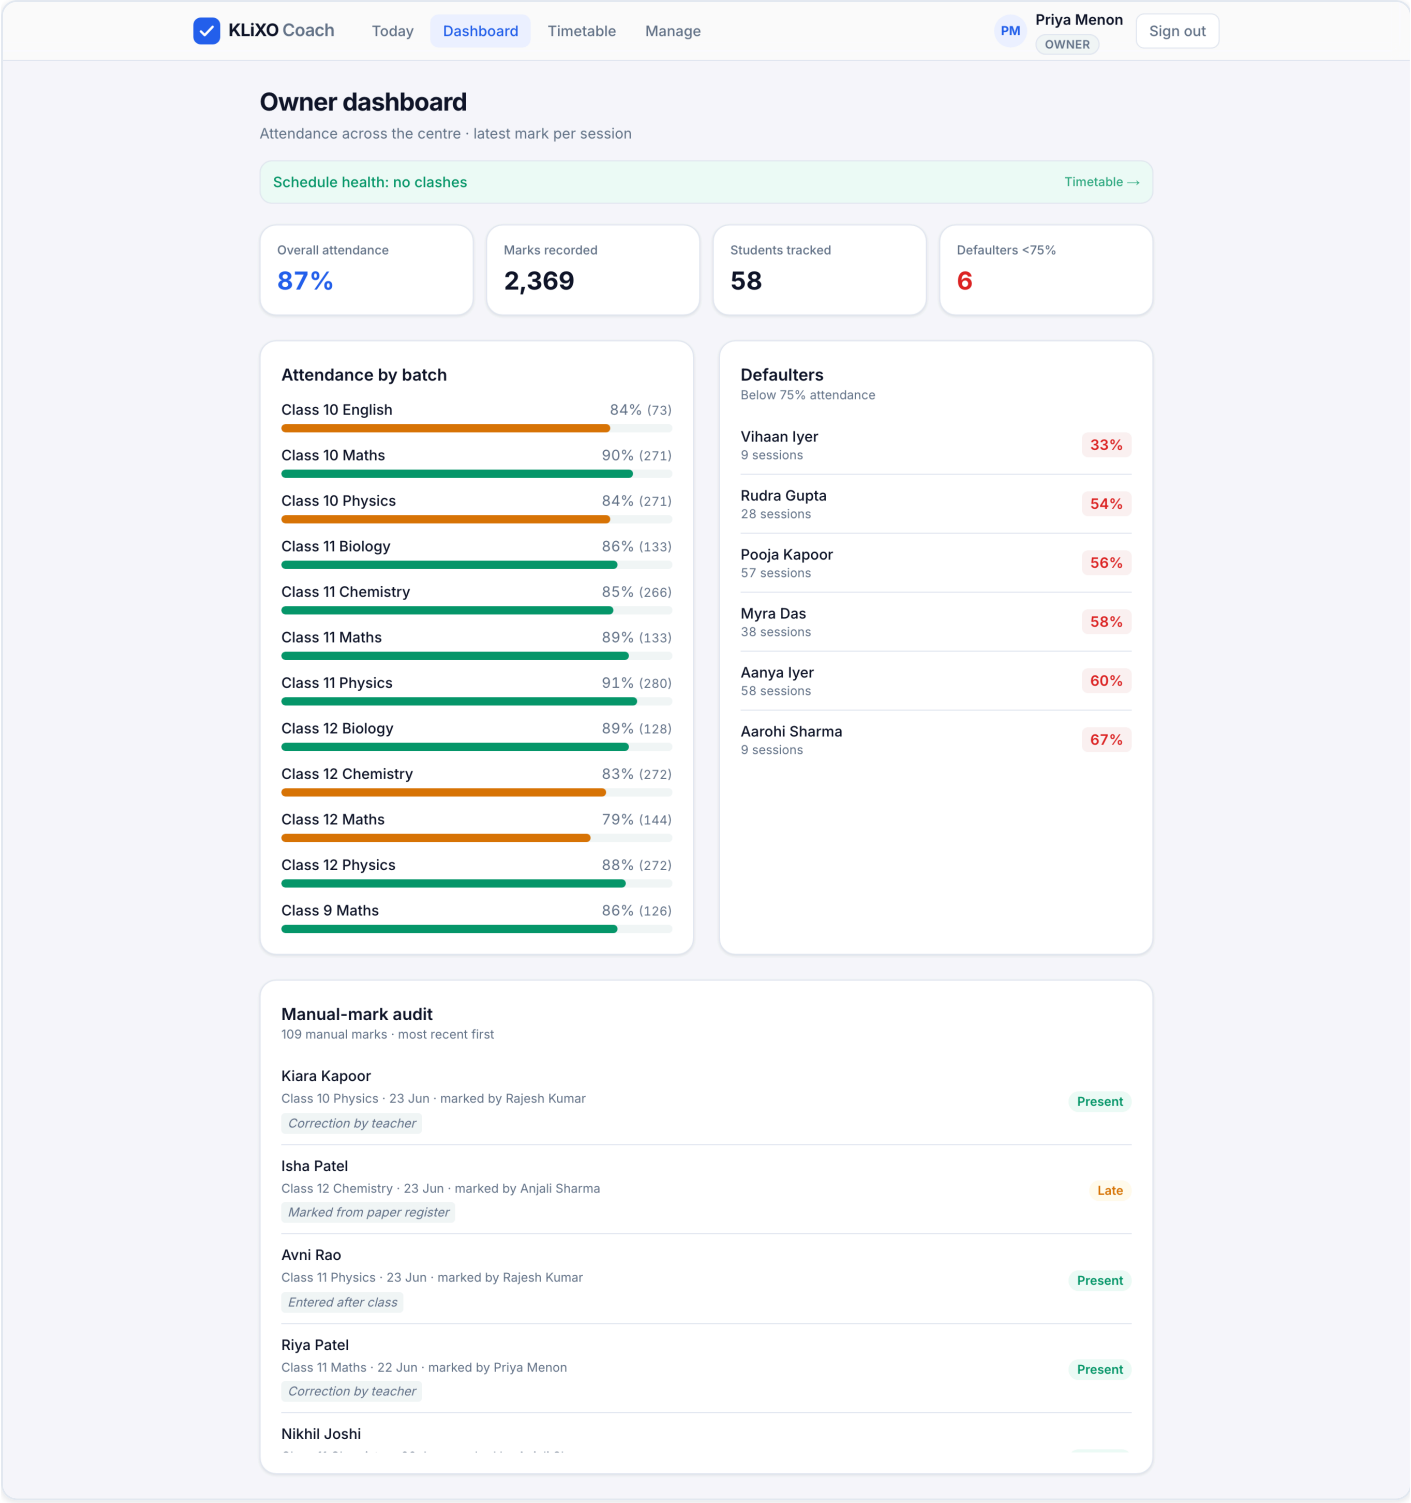

Situation	What happens
Marking today, first time	Saved as a normal app mark — no reason needed.

Filling in a class from the past that was never marked	Saved as a manual backfill with one shared reason.
Changing a student's already-saved status	Saved as a manual correction — that student needs its own reason.
A student you didn't change	Left exactly as it was (no new record).

Note Every manual mark and its reason appears in the owner's **Manual-mark audit** on the dashboard.

7 · Owner — Dashboard

The owner's home screen: a live read of attendance across the centre, plus health checks for the schedule and data.

Overall attendance, defaulters, by-batch bars and the manual-mark audit

- **Top tiles** — overall attendance %, marks recorded, students tracked, and how many are below the threshold.
- **Schedule health** — a banner flagging timetable clashes (tap through to the Timetable).
- **Data integrity** — a banner if a direct spreadsheet edit left a broken reference (e.g. a class pointing at a deleted room).

- **Attendance by batch** and **Defaulters** — who is falling below the threshold.
- **Manual-mark audit** — every correction, who made it, when and why.

8 · Owner — Today & extra classes

The owner's Today screen lists **all** classes for the day. You can also schedule a one-off **extra class** that isn't part of the weekly timetable.

Add extra class

Scheduling a one-off class

1. Choose the batch, date, time, room and teacher.
2. Save. If the room or teacher is already booked at that time, the portal blocks it and tells you what clashes.

Note A student double-booking is allowed but warns you; a room or teacher double-booking is blocked.

9 • Timetable

The weekly plan. Each **rule** (a batch on certain weekdays at a time, in a room, with a teacher) generates the actual dated classes automatically.

Add rule

Creating a recurring rule

1. Pick the batch, the weekdays, start/end time, room and teacher.
2. Set **Effective from** (and optionally **Effective to**).
3. Save — classes are generated for the next 30 days.

Editing is safe Changing a rule regenerates only *future, unmarked* classes. Past classes and any class that already has attendance are frozen, and substitutes you set are kept.

Effective to (optional)

dd/mm/yyyy

Saving regenerates only future, unmarked sessions of this slot.
Past and already-marked classes are frozen.

Save changes

End this rule

Stops generating after the date below; future unmarked sessions are removed, past and marked ones kept.

Last active date

24/06/2026

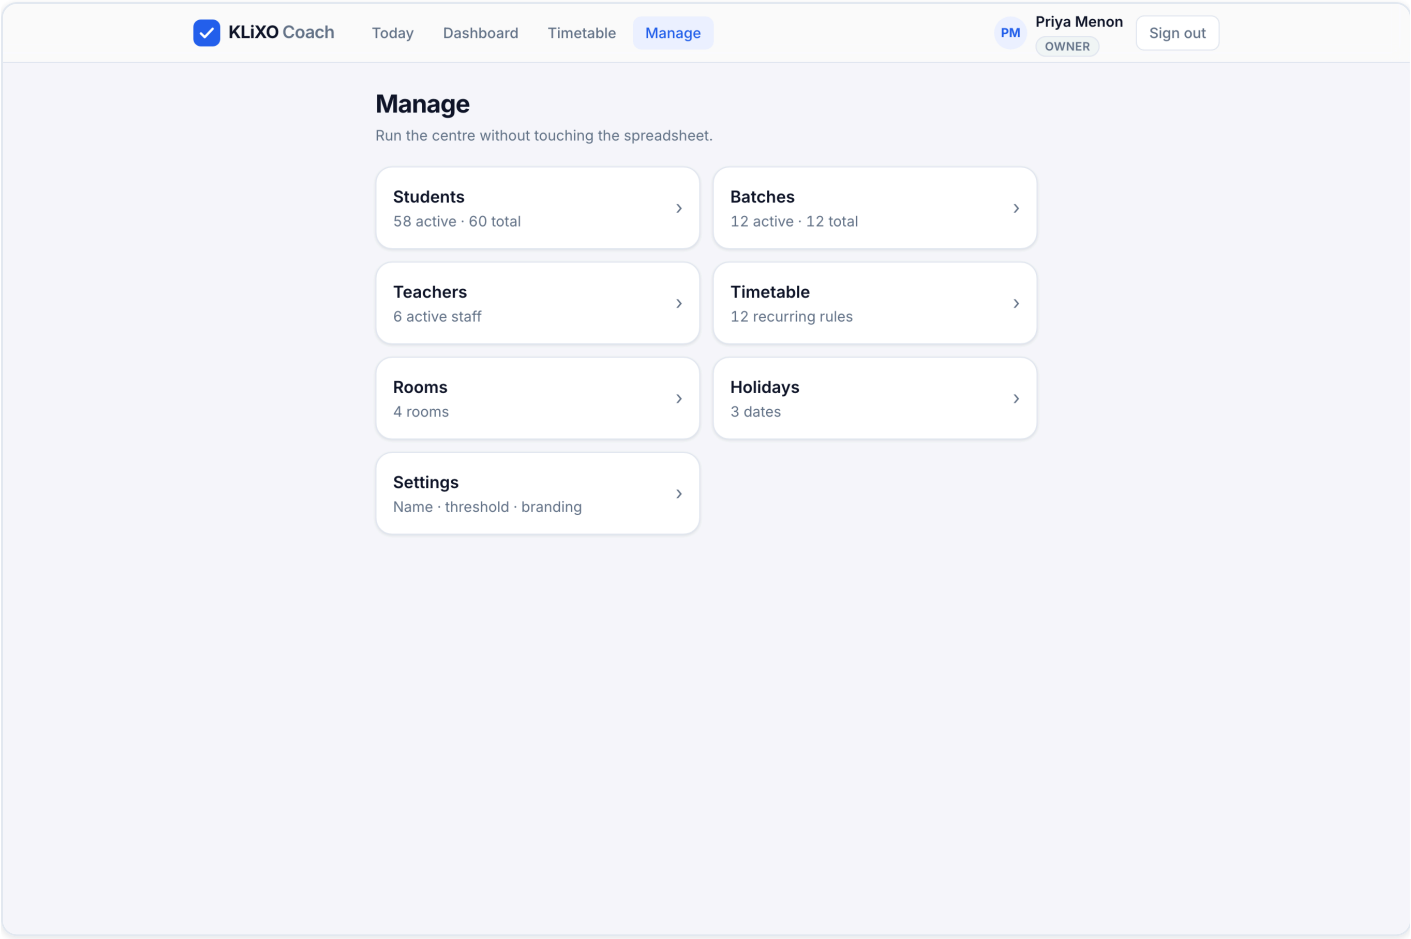

End rule

Editing a rule, with the option to end it from a date

Generation Classes are also re-generated automatically every night, so the next 30 days are always populated.

10 · Manage hub

One place for all centre data. Each card opens a manager and shows a live count.

The Manage hub

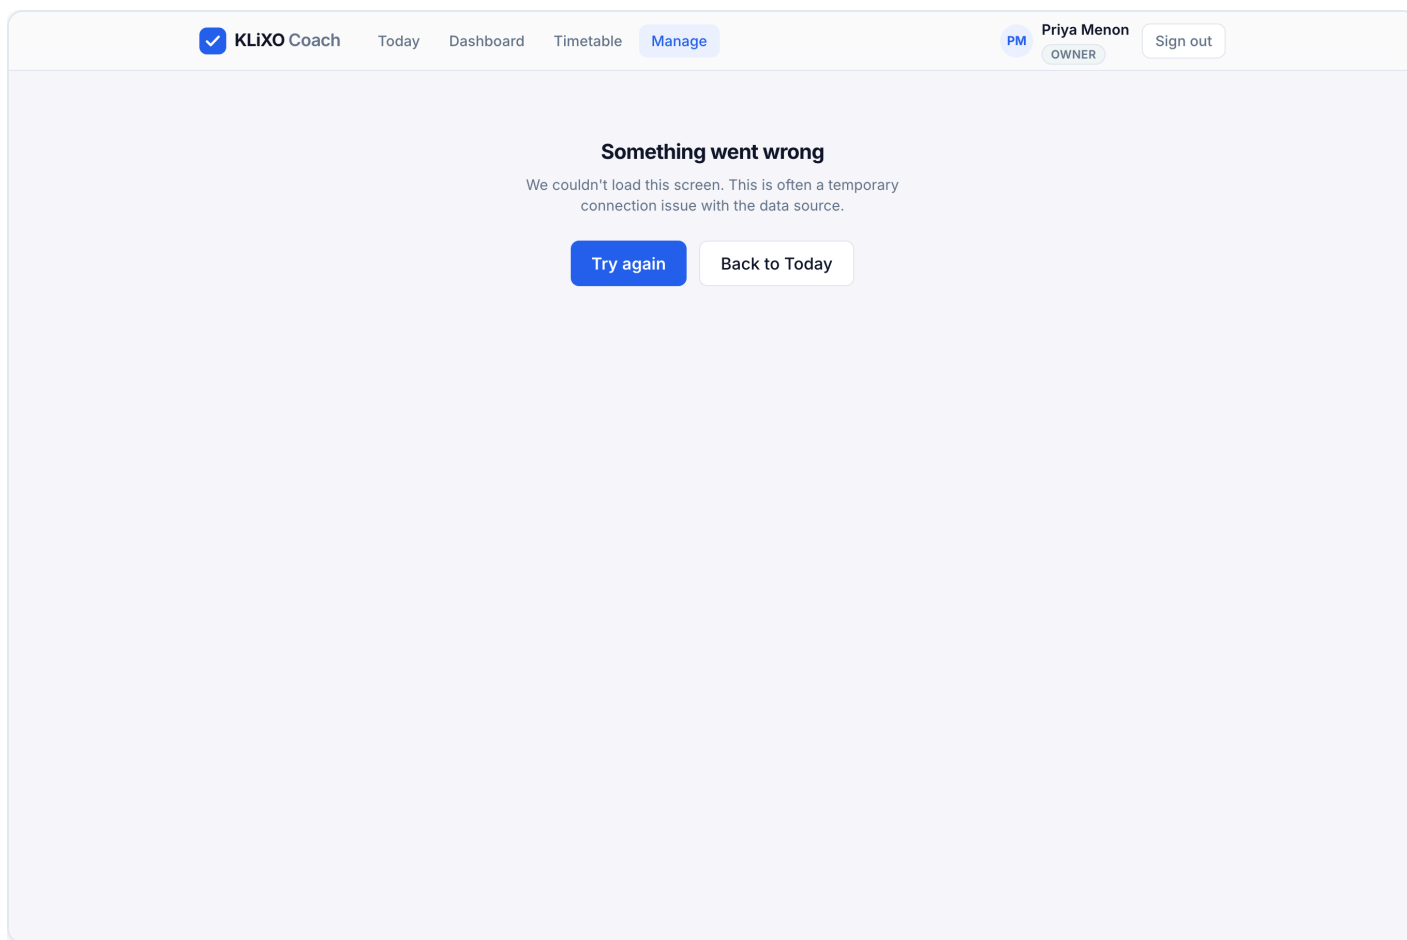

Note Everything here is owner-only. Changes save straight to the centre's records — there is no separate spreadsheet step.

11 • Students

Add students, edit their details, and open a profile with their batches and full attendance history.

The student list (active first)

Add a student

Adding a student

1. Open **Students** → **+ Add student**.
2. Enter the name and join date (phone numbers are optional).
3. Save, then open the profile to enroll them in batches.

Centre name, attendance threshold and branding

Setting	What it controls
Centre name	Shown across the portal.
Attendance threshold	The % below which a student is a "defaulter" on the dashboard.
Changeover buffer	Minutes required between two classes in the same room (used by clash checks).
Week starts on / Logo URL	Display preferences and branding.

17 · How attendance % works

- **Each class generates from the timetable.** A rule (batch + weekdays + time + room + teacher) creates dated classes for 30 days ahead.
- **The roster is enrollment-aware.** A student counts for a class only if their enrollment covers that date — late joiners and withdrawn students are handled automatically.
- **Percentage = present ÷ fully-marked classes.** Unmarked classes don't count against anyone. The latest saved mark per class is the one that counts.
- **Clash rules.** Same room or same teacher overlapping = blocked. Same student in two overlapping classes = warning.

18 · Security & data

- **Sign-in:** phone + PIN; sessions last 12 hours; repeated wrong PINs pause sign-in for ~15 minutes.
- **Roles:** owner-only screens are enforced on the server, not just hidden.
- **Privacy:** student phone numbers are owner-only; teachers see names only.
- **Integrity:** the dashboard flags broken references if records are edited outside the portal.
- **Records are kept:** deactivating a student, teacher or batch never deletes their history.

19 · Troubleshooting & FAQ

Question / problem	Answer
"Invalid phone or PIN."	Check the phone number is the registered one and the PIN is correct. Ask the owner to reset the PIN if needed.
"Too many attempts."	Wait ~15 minutes, or have the owner reset the PIN.
A class won't let me mark it	It's cancelled, or it's a future date. Past and current classes can be marked.
A student isn't on the roster	Their enrollment may start after that date, may have ended, or they're deactivated.
"Clash" when saving a class/rule	The room or teacher is already booked at that time. Change the time, room or teacher.
Can't delete a room	It's still used by a batch, rule, or future class. Reassign those first.
Dashboard shows an integrity warning	A record points at something deleted (often from a manual spreadsheet edit). Fix the reference in the relevant manager.

20 • Glossary

Term	Meaning
Batch	A class group (subject/level) with a default teacher and room.
Enrollment	A student's membership in a batch, with a start (and optional end) date.
Timetable rule	A recurring weekly slot that generates dated classes.
Session / class	A single dated class, generated from a rule or added as an extra.
Defaulter	A student below the attendance threshold.
Backfill	Marking a past class that was never marked.
Manual mark	A correction or backfill, recorded with a reason.
Substitute	A different teacher covering a single class.
